**Self Talk Test**

* Developed by June Price Tangney et al., *The Test of Self-Conscious Affect* (TOSCA-3S) (Fairfax, VA: George Mason University, 2000).

Below are situations that people commonly are likely to encounter in day-to-day life, followed by several common reactions to those situations.

As you read each scenario, try to imagine yourself in that situation. Then indicate how likely you would be to react in each of the ways described. Please rate ALL your responses because people may feel or react more than one way to the same situation, or they may react in different ways at different times. So you will find that you are circling at least one number per line.

### Scoring Sheet for the TOSCA-3S

The TOSCA-3S scenarios that you just responded to were created from the personal experiences of several hundred college students and non-college adults. Your responses can now be used to calculate your scores for Shame Self-Talk, Guilt Self-Talk and Blaming Others.

Transfer your circled answers from the TOSCA-3S to the lines below. For example, if you answered a “4” for item 1a, enter a 4 under the column labeled “Shame Self-Talk” on the line next to 1a. If you entered a “1” for item 1b, enter a 1 under the column labeled “Guilt Self-Talk” on the line next to 1b, and so on. Carefully transfer your responses, because the order for a, b and c will be different for each question.

When you have finished transferring your answers, add up your score for each column. For example, your “Shame Self-Talk Total” score will be the total of all of the numbers written in the first column. Compare your total scores to the scoring interpretation on page 3 of this doc.
